

“UC Davis Continuing and Professional Education played a direct role in enhancing my business”

–Todd Ellis, owner and project manager,
Ellis Construction

CONSTRUCTION MANAGEMENT

About Our Program

We offer the *only* construction management certificate program in the Sacramento area. Taught by professionals in the industry, our courses provide the real-world education you need –business, managerial and technical–to succeed in your career.

- **Experienced instructors**—Learn from current and veteran construction managers
- **Real-world learning**—Class projects and case studies provide dynamic training in emerging technologies and methods of project delivery
- **Networking opportunities**—Connect with instructors, professional associations and peers in the industry
- **Built for working professionals**—Our program can be completed in 12 to 18 months, and is available both in online and in-person formats

INDUSTRY FACTS

Construction managers earn a median salary of \$93,370 per year

—U.S. Bureau of Labor Statistics

Your Academic Path

Construction Plan Reading and Specifications

3.0 quarter units academic credit, X428.3

Learn how to read and apply blueprints from conceptual drawings to final construction. Prerequisite for *Estimating, Preconstruction and Bidding*.

Estimating, Preconstruction and Bidding

4.0 quarter units academic credit, X428.6

Through lecture, case studies and an interactive bid simulation, examine methods and processes for generating accurate estimates using the latest estimating tools.

Project Planning, Scheduling and Control

3.0 quarter units academic credit, X428.7

Discover skills and best practices necessary to effectively plan and control projects of any size, as well as gain an in-depth understanding of scheduling and project controls.

Construction Accounting and Financial Management

3.0 quarter units academic credit, X428.4

Learn the basics of construction accounting and the importance of strong financial management in the construction industry. Students will examine common best practices for internal controls and risk management.

Construction Law and Contracts

4.0 quarter units academic credit, X406.1

Through an exploration of topics such as bidding rules, contract administration, liabilities and more, discover how to recognize legal issues that can arise during the construction process in this overview of construction law.

Construction Project Management: Bid and Beyond

3.0 quarter units academic credit, X428.8

This course will help students identify techniques to overcome potential problems and pitfalls when bidding for and managing their own projects. By tying together key concepts (including managing risk, scope, cost, schedule, quality and onsite safety) this course will offer students the opportunity to develop a comprehensive reference for the entire delivery process from design development through construction completion.
